

Solve them for good with a seamless roof from *Adurel*®

Anquilla BWI

Deck Grade Roof

Here are some of the benefits

- **Warranted through hurricane winds:** Advanced engineering combines 3 forms of attachment to insure performance through hurricane winds. If the deck is standing, the warranty holds. There is no better warranty available.
- **Highest Energy Savings:** Superior reflectivity reduces heat gain from the sun up to 60F and can reduce energy costs 27% over silver roofs.
- **Warranted Repairs:** High quality repairs using Adurel are warranted 5 years and reduced labor costs can net a 50% savings over other methods.
- **Doubles as a deck:** Systems applied on patios, pool decks and roofs can double as pedestrian grade deck systems were appearance, durability and waterproofing must work together.
- **Waterproofs Walls:** Elastic, breathable or penetrating wall waterproofing systems combine esthetics with functionality to waterproof masonry, wood, stone and brick. Also used on patio blocks, stamped concrete and pavers to preserve and beautify the surface.
- **Stops Rust:** Adurel can waterproof, beautify and protect metal roofs from the elements and driving rain. Finished system carries a 12 yr renewable warranty.
